"Topological analysis of the aerobic membrane-bound formate dehydrogenase of Escherichia coli.";

J. Bacteriol 180:6625-6634(1998).

-i- FUNCTION: ALLOWS TO USE FORMATE AS MAJOR ELECTRON DONOR DURING AEROBIC RESPIRATION. SUBUNIT GAMMA IS PROBABLY THE CYTOCHROME B556(FDO) COMPONENT OF THE FORMATE DEHYDROGENASE.

-i- SUBUNIT: FORMATE DEHYDROGENASE IS A MEMBRANE-BOUND COMPLEX, FOR BY SUBUNITS ALPHA, BETA AND GAMMA.

-i- FUNCTION: PRODUCES ATP FROM ADP IN THE PRESENCE OF A PROTON GRADIENT ACROSS THE MEMBRANE.
-i- CATALYTIC ACTIVITY: ATP + H(2)0 + H(+)(In) = ADP + phosphate.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             PROSITE: PS00622; HTH_LUXR_FAMILY; 1
